

**Course Duration:** 4 months  
**Starts:** April 2025

**Who can apply?**  
Grade 12 Graduates and  
Job Seekers

All course materials and  
computer equipment  
supplied.

**Blended Delivery:** Lectures - 1 Day per  
week (face-to face); Coursework - 1  
Day per week (self-paced)

## WHAT DOES THE PROGRAM INVOLVE?

Learn the fundamentals of software engineering over a 16-week part-time paid study program and kickstart your professional career pathway into a dream technology career.

## WHY PARTICIPATE?

The Deadly Coders Academy exists to provide pathways to meaningful tech industry careers for senior Indigenous school students and job seekers. This program delivers hands-on, quality learning programs which offer practical skill development in the software engineering discipline, filling critical skill shortages and delivering skilled entry level technicians to ANZ's traineeship program.

## PROGRAM OUTCOMES:

Upon completing the program, graduates can secure an 8-month full time contract with ANZ, extending their experience to a total of 12-months. After this period there is the potential for permanent hire.

## WHAT DOES THE PROGRAM INCLUDE:

The Deadly Coders Academy Bootcamp includes:

- Paid study time (16 hours per week)
- Course registration fees
- Study materials and laptop (participants will retain all materials & equipment as part of the program)
- Development of student portfolio
- Academic and ANZ mentoring program

## APPLICATION PROCESS

- STEP 1.** **Apply Today:** Scan the QR Code below or visit [our website](#)  
**APPLICATIONS CLOSE 28 MARCH 2025**
- STEP 2.** **Applicant screening:** Deadly Coders will schedule an interview to assess your suitability for the program.
- STEP 3.** **Offer & Onboarding with ANZ:** Students will register with ANZ to onboard into the program
- STEP 4.** **PROGRAM COMMENCES 28 APRIL 2025**

## APPLY TODAY!

Submit your application  
on the Deadly Coders website  
[DeadlyCoders.org.au/anz](https://DeadlyCoders.org.au/anz)

## ENQUIRIES:

**APPLICATIONS CLOSE FRIDAY 28 MARCH 2025**

# Software Engineering Bootcamp

Start your professional career pathway into a dream technology career

## WHAT IS THE COURSE?

The Software Engineering Bootcamp is an intensive 16-week paid study program designed to equip Indigenous Australians with essential programming and software development skills. This Bootcamp offers a balanced combination of in-person and online learning, providing participants with hands-on experience in programming languages like GoLang, mobile app development, cloud computing, and software engineering principles such as agile methodology. Students will be well supported, with a comprehensive mentoring program to ensure their learning success through the 16-week course duration.

### TRAINING EXCELLENCE

Participants will learn from top computer programming educators, gaining practical knowledge and programming skills that are used by software engineers globally. Supporting mentoring program includes non-academic and academic sessions.

### SOFT SKILL DEVELOPMENT

Curriculum includes the development of core soft skills that students will need to thrive in commercial software engineering environments: independent learning, teamwork, ethical behaviour, and presentation skills.

### PROGRAM OUTCOMES

Participants will build a portfolio of software engineering projects throughout the course, enabling preparation for post-program interviews at leading Australian corporations at the completion of their program. ANZ will supply a laptop and study materials, which students retain.

## SOFTWARE ENGINEERING

Learning Units:

1. Introduction to Programming
2. Advanced Programming
3. Mobile App Development
4. Software Development Practices
5. Software Engineering Principles
6. Introduction to APIs
7. Cloud Computing
